

Annual AHERA Notification  
2015 – 2016

This notice is to inform you that the district has completed an asbestos inspection and management plan as required by the Asbestos Hazard Emergency Response Act (AHERA). The management plan has been accepted by the State of Michigan and is available for your review in the office of each school building. The management plan contains information regarding the location of asbestos containing materials (ACM) in all school buildings, the condition of the ACM and a plan for dealing with the ACM.

At least once each school year, the district will inform you in a similar manner about asbestos activities including: re-inspection, periodic surveillance, response actions and post response action activities that are planned or in progress.

The following asbestos related activities are currently planned or are in progress for the 2015 - 2016 school year: None planned.

**Periodic Surveillance:** Once every six months, ACM must be visually inspected for changes in condition. This will be performed by BCPS personnel. Our periodic surveillance schedule will be November 2015 and May 2016. ACM will be repaired, if damaged, and maintained by the district Operations and Maintenance Program (O&M).

**Response Actions:** These are activities designed to reduce or eliminate the potential for asbestos hazards. In general, the asbestos containing materials (ACM) present in school buildings are listed in each building management plan.
